Research Fellows

Barbara Rose Johnston

Barbara Rose Johnston is a Senior Research Fellow at the Center for Political Ecology and occasional lecturer at UCSC. Barbara is an environmental anthropologist who studies the relationships between environmental crisis and human rights. Her current work explores the community dynamics of water resource management; and, the human environmental impacts of the United States Nuclear Weapons Testing Program as conducted in the Marshall Islands.

CURRENT AND RECENT WORK:
Senior Research Fellow, Center for Political Ecology. 10/91 - present. Recent consultative research projects include:

- Expert Witness, Principle Investigator "Hardships and Consequential Damages from Radioactive Contamination, Denied Use, Exile, and Human Subject Experimentation Experienced by the People of Rongelap, Rongerik, and Ailinginae Atolls" September 2001 (Republic of the Marshall Islands, Nuclear Claims Tribunal);
- Thematic Review briefing paper for the World Commission on Dams on "Reparations and the Right to Remedy" (July 2000);
SELECTED PUBLICATIONS:

Works in Progress

Cold War Crimes. This book-length manuscript under preparation documents United States funded biomedical research involving indigenous communities in the Marshall Islands, Alaska, Canada, and South America; the use of indigenous groups as unwitting research subjects in experiments that supported nuclear, chemical, and biological weapons programs; the human environmental impacts of nuclear and biological weapons tests; the consequential damages of human subject experimentation; and, summarizes the status of efforts to assign accountability and secure some measure of remedy.
